Doctors need to follow these steps to manage his chamber and start practicing :

1. Install the application following the instructions inside Developer Manual
2. Log in to the application using default doctor credentials. Default email : [doctor@example.com](mailto:doctor@example.com) Default password: 1234
3. Go to the menu chamber and there is already a chamber included by default which can be your primary chamber, you can also add multiple ones. Click the button manage.
4. Set your schedule for the particular chamber.
5. Go to settings and change credentials with your specific ones.
6. Go to appointment menu to add new appointments and you can also see appointments in the calendar, you can click on any date or any event to bring appointment list for that day on the right part of this page
7. From appointment list you can go to either patient profile or prescription for the patient for this appointment directly
8. From the prescription menu you can either create a new one for a new patient or for a previous patient, the prescriptions you create from here are not attached to any appointment
9. From patient menu, you can see all your patients as a list and also can manage their profile
10. From the billing menu, you can create a new invoice for patients which you can print later on and provide to the patient
11. From settings, you can change credentials and also the logo
12. From top right of each page where your name is shown, a click on it will bring two submenus named profile and logout.
13. From profile, you can change your login credentials and also can change your password.
